

Project Description

Data analysis (for a travel agency) to determine the following:

Which countries are the top destinations for visa applications?

What is the total revenue from visa application fees?

How many visa applications were submitted each month?

What is the total revenue from visa application fees?

Which city had the highest number of hotel bookings?

Customer Demographics

Which country has the most customers?

What's the gender breakdown of customers who booked the most services?

What is the total amount spent per customer (visa + hotel + ticket)?

Are there customers who booked only a visa but not hotel or flight?

Cross Table Insights

Do customers who get visa approvals also book flights and hotels with us?

What is the correlation between visa approval and spending on hotels?

What is the average total cost per complete booking (visa + hotel + flight)?

Which cities are most visited after visa approval?
